

The [Strangemaps](#) blog posted a real interesting map over the weekend.

[This map](#) shows what individual state gross domestic product (GDP) numbers are equal to. GDP is seen as the best way to compare Alabama's is ranked 25th according to the list, with its \$195 billion GDP equaling that of the 36th best in the world - Iran.

Check out [the post](#) to gain a better understanding of the nuances, including where other states ranked in the list.
