

**UPDATE:** 5 p.m. - Share gas prices on with The Hub - [right here...](#)

We'd post links, but we're all aware of the rising gas prices across the country in general and here in Birmingham in particular. We started hearing the rumors yesterday on both Facebook and Twitter and the long lines reported by folks ([including James Spann via Twitter](#)) says that as one person put it "the Chicken Littles are having their day today."

Which leads us to [today's Magic City Question](#), appropriately posted after all of you have gotten back from lunch... We'll look forward to your answers (over there that is).
