

Despite Congress recently [passing a delay of the switch from analog to digital television until June 12](#), many television stations (including several here in town) are still planning to go forward with “the switch” on the original date of February 17.

Currently [NBC 13](#), [CBS 42](#) and [APT 9](#) all plan to proceed with the signal switch. We’d appreciate it if folks could chime in on if they know whether or not the other local stations will follow suit.

UPDATE: Just [got word via Twitter](#) (thanks James Spann) that ABC 33/40 will continue to broadcast in both analog and digital until June 12.
