

Long time listeners to [Rock 99.5](#), a.k.a. [WZRR-FM](#), recently learned their classic rock station was changing formats to [CHR](#). [The folks at Radio Insight first reported the change](#) late last week after they noticed the site was down. As they point out via [their format change watch list](#), it's part of an annual trend - one that's shows there's not necessarily any set formula either.

There are folks online attempting to organize an [Occupy 99.5 the VIBE fan page](#) on Facebook, though the [Bring the Rock back to Rock 99.5 fan page](#) also exists. The pages have 115 fans and 201 fans respectively as of 8:15 AM Thursday morning (January 5). There's also [an interesting video on YouTube posted by BababoeyBHM](#) - who incidentally just joined the video-sharing service the same day the piece was posted.

According to comments on both pages, comments being left on the VIBE's page not supporting the format change are being deleted almost as soon as the entry is made.

This is the station's fourth format change overall since its launch in 1977.
